

Please amend claims 5, 11, 13, 15-17 as follows:

*Sub C*  
5. (Once Amended) A portable device for sending information to called stations over a telephone line, comprising:

*A 2*  
a. a device memory;  
b. a docking port for receiving information from an external memory and loading said information into said device memory, wherein said information comprises card information relating to a telephone purchase and is received from a seller memory connectable to said external memory;

c. a converter for converting said information from said device memory into an audible representation of said information; and

d. a send key for activating said converter;

whereby, by activating said send key, said audible representation is presented to a microphone of a telephone set for transmission to at least one of said called stations.

*A 3*  
11. (Once Amended) A method of sending information related to a telephone purchase from a customer to a seller, comprising the steps of:

a. providing an element for performing the step of storing information, including card information, received from a seller in memory located at a customer-site telephone; and

b. providing an element for performing the step of subsequently sending said information from said memory located at the customer-site telephone to a seller.

*A 4*  
13. (Once Amended) A method of sending information related to a telephone purchase from a seller to a customer, comprising the steps of:

a. providing an element for performing the step of recording information from said customer in digital form; [and]

b. providing an element for performing the step of determining whether a telephone of said customer is memory equipped; and

A4 [b]c. providing an element for performing the step of sending said information from said seller to said memory equipped telephone of said customer for storage.

---

Sub C1 15. (Once Amended) A system for sending and receiving orders for goods, comprising:

a. a telephone at a customer site having a customer memory for storing and sending information;

b. a telephone at a seller site having a seller memory and a display for respectively storing information, provided by said customer and keyed in by personnel at said seller site and stored in said seller memory, confirming whether a telephone of said customer is memory equipped, and sending information stored in said seller memory to said customer [site] memory for use during a subsequent order; and

A5 c. a telephone network connecting said telephone at a customer site with said telephone at a seller site while an order for goods is placed.

16. (Once Amended) A computer program product for sending information related to a telephone purchase from a customer to a seller, comprising:

a. a memory medium; and

b. a computer program stored on said memory medium, said computer program comprising instructions for storing information received during a first purchase transaction from a seller over a telephone line in memory and for subsequently sending said information to a seller for use during a second purchase transaction.

17. (Once Amended) A computer program product for sending information related to a telephone purchase from a seller to a customer, comprising

a. a memory medium; and
